WOLSELEY

# ABOUT US

Abk building solutions ltd has gained a firm reputation for **excellent standards** in workmanship, emergency response time and consistent client satisfaction.

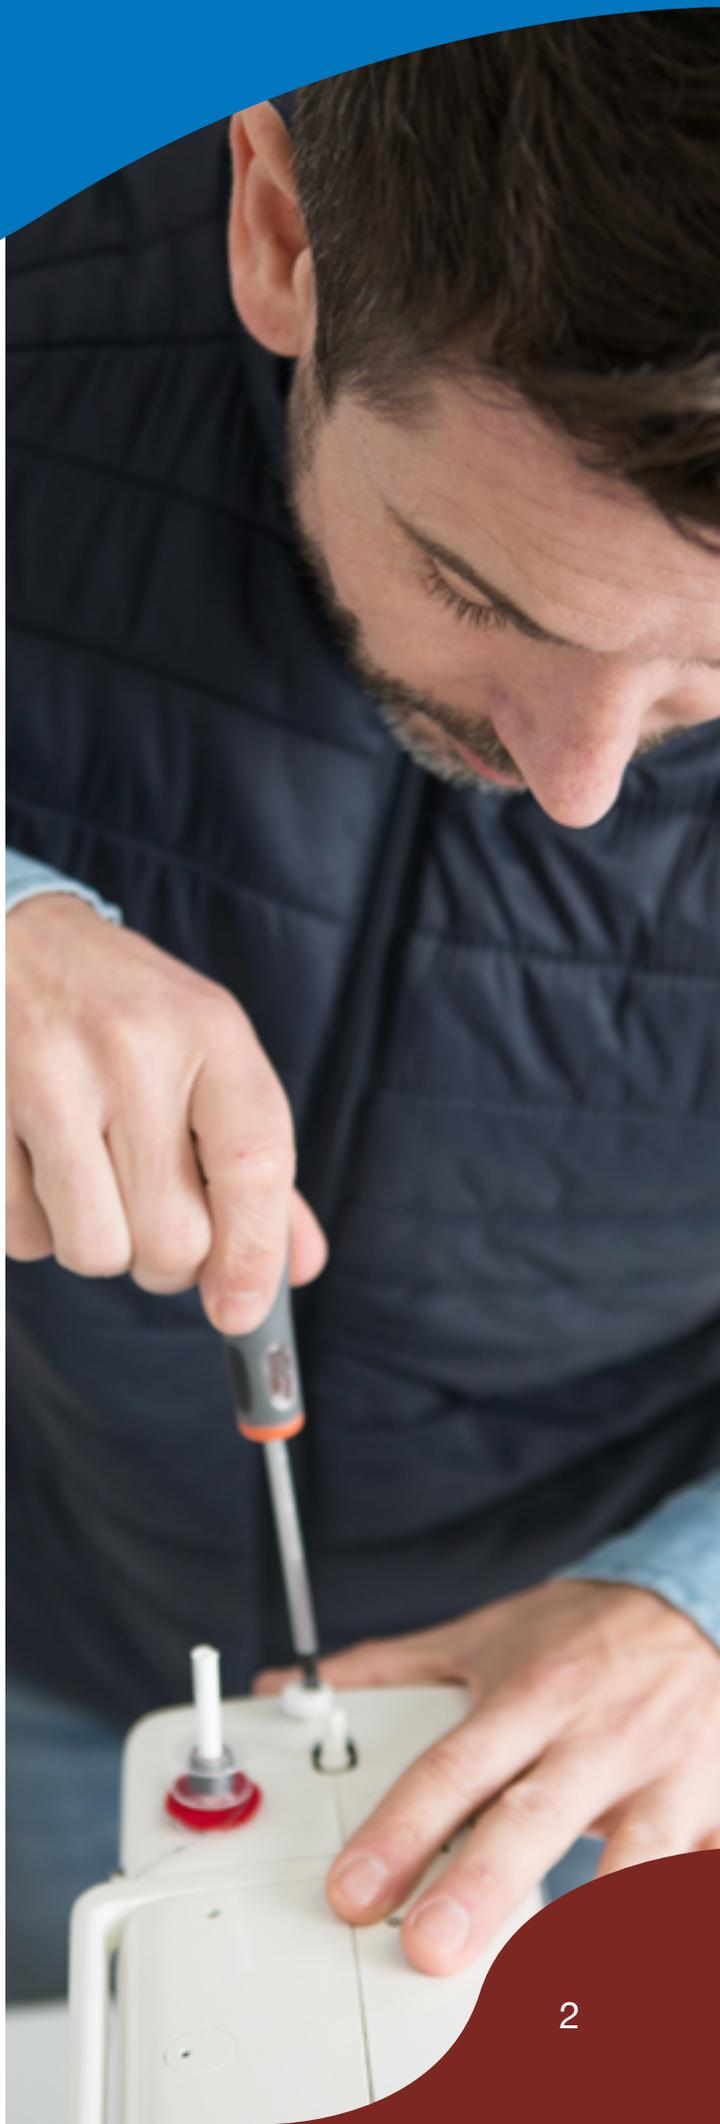

We have **over 25 years of experience** in the plumbing, heating and building industry. We offer **gas safe** services for domestic and commercial.

We offer you services to suit your individual requirements, **from domestic to commercial**, with our expertise and proposals free.

We carry out pre-planning of **maintenance and replacement** works. We cover electrical, mechanical and air conditioning devices. **This will reduce your equipment's breakdowns and prolong its life.**

We have a strong commitment to providing the customer with a **high quality service at a competitive price.**

- ✔ **Gas Safe Registered**
- ✔ **Members Of Small Businesses Association**

# WHAT OUR CUSTOMERS SAY ABOUT US

Source: [www.yell.com](http://www.yell.com)

## Outstanding Company

I would have no hesitation to 100% recommend Rob to friends and family, or anyone wanting a genuine, dedicated and very competent professional company. He is definitely the first person I will contact should I need any work done in the future.

## Boiler Replacement and servicing- A\*

Amazing communication and work carried out. I would recomened. We are calling them for all our services in the future.

## New water tank

They were so efficient and helpful with any problem. They got the work done without fuss or mess. Very impressive.

# COMMERCIAL BUILDING MAINTENANCE

We guarantee that you will receive an **effective service**, ensuring your business continues to run smoothly.

Our aim is to limit damage to your property, make safe and repair or replace damaged items in the most efficient and appropriate way. Our engineers will arrive to your site to resolve your maintenance need as quickly as possible.

All our **Gas Safe engineers** are **qualified** in their trade and wear full company uniform.

Our team is **fully trained and aware** of Health and Safety and legal requirements.

# BOILER

Many of the older types of gas boilers are only 60% efficient in converting gas into heat and they can breakdown more frequently. This means your gas bills are much higher than they need to be and they are not environmentally friendly.

We specialise in the installation of **modern, highly efficient** boilers. Our engineers are **Gas Safe registered**.

We offer a wide range of services that include:

- ✓ **Cleaning**
- ✓ **Domestic & Commercial Servicing**
- ✓ **Installations**
- ✓ **Repairs**

# GAS

If you need a **Gas Safe Engineer**, make us your first choice. From cooker installation through to gas safety checks, we deal with all things gas-related. Our **experienced and professional** staff can provide you with **efficient and effective services**, at a convenient time for you.

- ✓ Appliances
- ✓ Cooker Installation
- ✓ Leak Repairs
- ✓ Safety Checks
- ✓ Servicing

# CENTRAL HEATING

We are focused on providing you with **the very best products and services at pocket-friendly prices:** whether you are interested in installing a completely new central heating system or you would like us to service an existing one we installed, we can meet your needs at highly competitive rates.

In the event that you should experience any problems with your heating system, our **experienced central heating servicing** and repairs team can get it back up and running in no time at all.

- ✓ **Installation**
- ✓ **Landlord Safety Certificates**
- ✓ **Power Flushing**
- ✓ **Equipment**
- ✓ **Servicing**

# PLUMBING

If you need help with plumbing, let your search end with us.

Whether you have a toilet that will not flush, a slightly leaking tap or you want a new bathroom plumbed, we can sort it for you with our **high quality and efficient services**.

So, if you would like reliable plumbing services for **competitive prices**, give us a call today.

- ✔ **Water Treatment**
- ✔ **General Plumbing**
- ✔ **Water Chlorination**

# FIRE ALARM TESTING

The vast majority of buildings need a fire alarm to ensure the protection of life and property. They are **the safest and most reliable way** of informing all employees and staff of a fire situation.

Fire alarm systems **should be regularly tested** to ensure that they safeguard persons within the premises.

A manual call point is activated to test audibility and operating effectiveness of the system.

This is usually done by inserting a dedicated test key.

The test is then recorded in the site logbook.

# GAS DETECTORS

We have the people, programs and processes to deliver **the industry's best** safety equipment and gas detection instrumentation to your operation.

We provide the **top quality equipment** and unprecedented support you need to keep your people safe and your operations profitable.
